Hi

I'm Stacey

I was born with a **unilateral cleft lip and palate**, and I have harboured a long-standing **dream of photographing** cleft babies, children and adults for a project. However, this dream always felt too immense to accomplish, and I was unsure of where to start. When my baby boy was born with a **bilateral cleft lip and palate**, my determination to turn this **dream** into reality grew even stronger.

"Many cleft photography images appear clinical and impersonal. My aim is to produce artistic and beautiful photographs for parents."

I am passionate about supporting individuals born with **clefts** or parents of children affected by clefts through my **photography**, aiming to raise awareness for **cleft lip and palate**. Currently engaged with cleft services, I have a deep understanding of how this can positively impact **mental health in the future**, and I take pride in leading this initiative.
